

## COMPACT PRO-AIR™ ACAIR2000®

ONLY FROM **SALISBURY** by Honeywell

### Arc Flash Hood Cooling System - NEW Upgraded Circuit Board and Battery

*Salisbury by Honeywell's PRO-AIR™ microprocessor controlled Air System is easy to use and easy to wear.*

Salisbury's PRO-AIR™ ACAIR2000® system is designed to blow forced ambient air through a single intake hose, providing fresh oxygen to the worker and reducing the hazardous effects of shield fogging. The unit is microprocessor controlled and operates automatically by blowing air continuously for over three hours on one charge. On the back of the unit is a button that pauses the continuous flow, if needed. Use this unit with Salisbury's PRO-HOOD® and PRO-WEAR® arc flash protective clothing.

The PRO-AIR ACAIR2000 compact powered air system easily mounts to most standard hardhats and functions in one lightweight (less than 10 oz.) easy to use unit. The unit cools the worker and reduces fatigue while wearing a Salisbury Arc Flash PRO-HOOD.

The PRO-AIR ACAIR2000 includes a lightweight blower assembly, universal band, bendable intake hose, Ni-MH rechargeable batteries, and an AC wall charger.

Patents Pending

Cat. No.	Description
ACAIR2000	Lightweight Air System for PRO-HOODS

Intake hose attaches to the blower unit with a bendable joint to allow easy movement.

Use this unit with Salisbury Arc Flash Protective PRO-HOODs.
