

INSULATING APRON

ONLY FROM **SALISBURY** by Honeywell

Hard Working Products for Hard Working People.

Salisbury has gone to great lengths to protect workers from low voltage electrical hazards, by now offering an Insulating Apron. Salisbury's Insulating Apron, made from a high strength fabric reinforced Type II rubber, allows workers to add another layer of protection. Salisbury's insulating Type II rubber Insulating Apron, meets ASTM F2320 standards.

The Insulating Apron includes two Nomex^(R) bib straps and two Nomex waist straps with nonmetallic buckles. The straps are attached with reinforced stitching and Nomex thread. The insulating apron has straps that can be buckled around the back and around the neck which gives wearers a comfortable and supportive fit. The straps are adjustable so that one size will fit most workers. The apron measures 42" from the top of the bib and has a full width of 30" to wrap around the front of most workers. This insulating apron can be used for working on switchgear, underground cable and many other electrical applications where avoiding touch potential is key. This product can also be used by first responders and other emergency teams when answering the call for a hybrid vehicle accident. Use these aprons where there is a possibility of accidental contact with energized equipment or lines. These products are not intended for purposeful contact with energized equipment.

Flame Resistant - Self Extinguishing
Type II - Ozone and Ultra Violet Resistant
Fabric Reinforced - Puncture and Tear Resistant
Flexible to -40°F

Cat. No.	ASTM Class	Max Use	Type	Size	Color	Weight ea. lbs. (kgs)
APR00	00	500VAC	II	One Size Fits Most	Brown	1.95 (.88)
APR0	0	1000VAC	II	One Size Fits Most	Yellow	2.53 (1.15)
APR1	1	7500VAC	II	One Size Fits Most	Yellow / Orange	3.5 (1.59)
