

## ALL ANGLE GROUNDING CLAMPS

from **SALISBURY** by Honeywell

*Reach difficult angles both left and right.  
Great for overhead or substation applications.*

Salisbury's all angle clamps are just the thing when the approach angle to the conductor or bus is too extreme to use regular "C" Type or flat jaw clamps. All angle clamps simplify grounding in these difficult applications.

All angle clamps feature a serrated three-finger jaw configuration to safely and securely grip conductors and buss.

Cat. No.	Mat.	Clamp	Screw	Weight Lb ( Kg )	ASTM Grade / Class / Trim
<b>ALL ANGLE CLAMPS, Clamp Opening: Min. 1/4" - Max. 2-1/2"</b>					
<b>7315PG</b>	AL	Serrated Jaw, Threaded	Posigrip, BR	4.3 ( 2.00 )	5 / B / 7
