ELECTRIGUARD™ 20kV Dielectric Overboot

Re-engineered 20kV dielectric footwear

Better fit, better safety, greater comfort: Tested to 20,000 volts with a redesigned fit that's easy to pull on and off.

When it comes to demanding jobs in the field, linemen turn to the gear they can rely on. That's why we've redesigned our classic dielectric overboots – the same proven protection you expect from Salisbury, now with ergonomic innovations to ensure hassle-free donning and doffing plus a comfortable fit.

This improved design was developed through extensive tests and user interviews to identify the features linemen most need for safety and productivity. The end result is a pair of dielectric overboots that aims to enhance the work effectiveness of linemen.

Innovative Convenience

Innovative convenience drives more than just comfort – these versatile Salisbury overboots provide increased freedom throughout the work zone, which in turn can help reduce the number of workers in hazardous locations since they are not limited to confined areas such as grounding mats.

Proven Protection

Rated at 20,000 volts to protect workers from step potential.

ASTM F1116

Standard Test Method for Determining Dielectric Strength of Dielectric Footwear

ASTM F1117

Standard Specification for Dielectric Footwear

14" VERSION

ELECTRIGUARD™

Better Comfort

The wider opening and nylon lining also enables accurate sizing and a more comfortable fit

Easy On

Wider upper boot with integral pull up handles intended to facilitate donning over standard work boots

Color Identification

New color style denoting ASTM F1117 20kV dielectric performance

Greater Visibility

Reflective stripe for enhanced visibility

Easy Off

Rear kick-off lugs help wearers easily remove overboots

17" VERSION

Outsole

Vulcanized rubber with a nonskid bar-tread sole
